

秀明大学 2023年度高大接続講座シラバス

開講日	2023年12月23日(土)
講座テーマ	英語ライティング
担当教員名	コンロイ アンソニー ポール
講座の概要	Students participating in this course will be introduced to and practice a writing technique known as Spider Graphing. This technique assists a writer with a plan for a particular piece of writing before they begin to write. It may also be used to prepare speeches or short talks when preparation time is limited.
講座の到達目標	The aim of this particular lesson is to introduce and then give participants experience with a writing test preparation technique.
テキスト・授業資料	Class materials will be distributed in the course as needed. Please complete the assignments sent in advance and bring them with you.
事前課題の概要	Prior to the class, students are requested to read through a selection of writing test questions and select the three that they would be most likely to try in a test of written English. For each of these three questions, students will be requested to write a simple plan for each answer. Finally, one of the plans will be used to write the answer.
事後課題の概要	Students will receive a copy of a particular test question answer and a plan that does not actually follow what is written and requested to note the differences. They will also receive a selection of questions and then select one of them and write the answer using a spider graph to assist with the planning. (講座終了後2週間以内に返送してください。)
評価	事後課題を確認・評価し、修了証を送付します。
